

Power Sport Fan Assembly

Ready for many popular vehicles

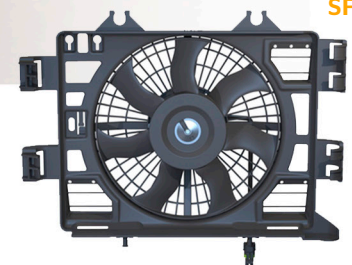

ATV/UTV are designed for a wide variety of off road conditions such as water, snow, ice, swampland, and open terrain.

The ATV/UTV Cooling Fan has very little protection. Exposure to debris, foreign objects, numerous types of terrain making this a high-risk part for replacement. The radiator cooling fan keeps the engine coolant at the correct temperature, if the radiator cooling fan motor is not running the engine will overheat.

Service Indications include the following:

- ✓ Over Heating Motor
- ✓ Excessive Debris
- ✓ Collision
- ✓ Extreme Climates
- ✓ Poor Maintenance
- ✓ Cracked Shroud/Blade

Best for:

Polaris Sportman Scrambler

SFA2100

Maverick

SFA2101

Polaris RZR

SFA2102

Can-Am Outlander Renegade

SFA2103

Did you Know?

- > The off-road segment of recreational activities is one of the fastest growing markets compared with the conventional segments in the motorsports industry
- > This segment is still in its infant stage demonstrating incredible scope for growth in the off-road world with the rising trend for all season recreational activities
- > Some states allow kids as young as 10 to ride ATVs/UTVs when supervised by an adult with a valid driver's license
